
Status of operations in Libyan airspace. Updated 13 Dec

Following on from the Safety Bulletin issued on 2 December (click [here](#) to see 12SAB018) IFALPA has been notified that the Tripoli FIR is closed until at least 2300 UTC 13 Dec although a NOTAM to this effect has not been issued by Libya. The closure is due to industrial action by air traffic control officers. We have also been informed that operators should strictly adhere to the NOTAMs presently in force regarding contingency routes in Libyan airspace.
